Hello, we're Vicarius.

We're on a mission to prevent hackers from exploiting corporate devices—and restore your sleep.

Our Philosophy

We're a team of engineers, designers and security experts passionate about cyberthreat protection. We believe in taking a proactive approach to vulnerability management because when it comes to your most critical assets, you need to be prepared for unexpected attacks. By providing SMEs with the tools they need to ensure they're always protected, we're helping make the world a safer and more secure place for all.

Remediate Vulns

Consolidate vulnerability **discovery**, **prioritization**, and **remediation** in a single solution.

TOPIA

vicarius

Product Overview

TOPIA protects your installed operating systems and third-party software from vulnerabilities

Vulnerability Management

Discover, prioritize, and remediate vulnerabilities all from a single, intuitive platform.

xTags

Internal and external threat prioritization by contextual factors

0-Day Detection

TOPIA's 0-day analysis engine automatically characterizes exploited areas in any binary software

User Management

Collaboration is hard. We make it easier

Network Scanner

Get full visibility into your network, visualized in an intuitive vulnerability scanning dashboard

Patch Management

Remediate vulnerabilities quicker with our advanced, integral patch management tools

Patchless Protection

Beat the patch gap and stay protected with or without a security patch.

Auto Actions

Streamline your organization's vulnerability management workflow and decrease operation costs
